

REMARKS

Favorable reconsideration and allowance of the present application are respectfully requested in view of following remarks. Claims 1-15 are pending. Claims 1 and 6 are independent.

§ 112, 1ST PARAGRAPH REJECTION

Claims 1-15 stand rejected under 35 U.S.C. § 112, first paragraph, as allegedly failing to comply with the enablement requirement. More specifically, the Examiner alleges that the feature of a data converter transmitting communication data to a remote control pan head without conversion if it is determined that the data format of the communication data does not differ from the data formation for the remote control pan head is not supported by the original specification. Applicant respectfully disagrees.

On page 7, lines 3-7 of the original specification state "in this case, the communication data inputted to the data converting part 36 corresponds to the data format for the communication of the pan head 10 (character-based), thus the communication data are transmitted to the pan head 10 as they are, that is, the character-based data." Accordingly, it is recited that in cases where the format of the communication data transmitted from the operation unit A corresponds to the data format of the pan head, the communication data are transmitted as they are as the data format without conversion. Therefore, the recited feature is not new matter.

Applicant respectfully requests that the rejection of claims 1-15 based on § 112, first paragraph be withdrawn.

CONCLUSION

All objections and rejections raised in the Office Action having been addressed, it is respectfully submitted that the present application is in condition for allowance. Should there be any outstanding matters that need to be resolved, the Examiner is
